Subject: EPA Conditional Approval on the Fish Sampling TSAP
Attachments: 160513 AppD Fish Substantive_Compiled.pdf; FK_Resp_EPA_160205_Fish_TSAP_Compiled_Comments.pdf; EPA Comments on Fish Sampling_05.13.16.pdf; 160222 RWQCB Comms on Draft TSAP for Fish Investigation FINAL.pdf; EPA Comments on Fish TSAP_08.12.16.pdf

Dear Mr. Brown:

The U.S. Environmental Protection Agency (EPA) has completed its review of the Task Sampling and Analysis Plan for Fish Investigation (Draft Final) (TSAP), Leviathan Mine Site, Alpine County, California, Leviathan Mine Site, Alpine County, California, dated June 13, 2016. Atlantic Richfield Company (ARC) submitted the TSAP to EPA pursuant to the Administrative Order for Remedial Investigation and Feasibility Study, Leviathan Mine, Alpine County, California (CERCLA Docket No. 2008-18, June 23, 2008).

EPA has completed its review of the June 13, 2016 submittal and provides the attached line by line response to ARC's response to EPA's May 13, 2016 comments.

EPA conditionally approves this document, provided these comments are addressed and incorporated as described. The work outlined in this Task Sampling Analysis Plan should be completed during the 2016 field season.

Section 9 of the TSAP states that Fish sampling will begin in August to prevent missing the 2016 field season due to early snow. Large brown trout typically swim upstream to spawn in September. USFWS was able to successfully collect fish in late October of 2013. USGS flow data show that 2016 flows are higher at both locations than they were during the same time period in 2013. **EPA requests that the sampling occur in late September.**

EPA requests timely notification of EPA of when ARC anticipates commencing the work. EPA notes that the information collected under this TSAP will be used to support both the Human Health and Ecological risk assessments, and that EPA has provided separate technical comments on the Human Health and Ecological risk assessment work plans

These comments reflect Washoe Tribe of Nevada and California response to the TSAP provided to EPA. EPA continues to work with the Tribe to ensure that their concerns regarding analysis of fish tissue are addressed.

Please provide a written report to EPA within 90 days of completion of field work.

If you have any questions, please feel free to contact me at (415) 947-4183 or Deschambault.lynda@epa.gov.

Best Regards,

Lynda Deschambault
Environmental Scientist

Subject: EPA comments – TSAP for Fish Investigation

Dear Mr. Brown:

The U.S. Environmental Protection Agency (EPA) has reviewed the Draft On-Property, Off-Property, and Reference Area Focused Remedial Investigation Work Plans—Task Sampling and Analysis Plan for Fish Investigation, Leviathan Mine Site, Alpine County, California, prepared on behalf of the Atlantic Richfield Company (ARC) by AMEC, dated February 5, 2016. This work was submitted to EPA pursuant to Administrative Order for Remedial Investigation and Feasibility Study, Leviathan Mine, Alpine County, California (CERCLA Docket No. 2008-18, June 23, 2008).

Attached please find EPA comments, along with comments from the Lahontan Regional Water quality Control Board dated February 3, 2016; and from the Washoe Tribe of Nevada and California dated February 5, 2016 for your full consideration.

At our upcoming June 13th meeting, EPA would like to discuss options for how the fish size used for tissue analysis can be extrapolated to fish consumed by human receptors.

Please provide line by line response to these comments along with a revised Sampling Analysis plan within 30 days, and prior to collecting samples please provide a revised map showing the sample locations identified based on the proposed mapping.

ARC must also submit documentation of compliance with substantive provisions of Applicable or Relevant and Appropriate Requirements related to taking fish for purposes of this TSAP and minimizing the probability of accidentally taking endangered or threatened species of fish, understanding that Section 121(e) of CERCLA exempts this sampling from procedural requirements related to permits to permits.

If you have any questions, please feel free to contact me at (415) 947-4183 or Deschambault.lynda@epa.gov.
